

# Graduate School of Geosciences 6<sup>th</sup> Research Conference

Friday, 18/01/2019, 10 a.m. – Lecture Hall 4.001 – Pohligstraße 3, 50969 Cologne

## Topics

**Dr. Frédéric Herman**

Institute of Earth Surface Dynamics (University of Lausanne)

Erosion by alpine glaciers

**Juliane Scheder**

Institute of Geography (University of Cologne)

Vertical and lateral zonation of Foraminifera and  
Ostracoda in the German Wadden Sea

**Dr. Dmitri Moisseev**

Department of Physics (University of Helsinki)

Chasing snowflakes - what do we learn about  
precipitation formation

**Thirza van Laar**

Institute of Geophysics and Meteorology (University of Cologne)

Investigating the cumulus cloud distribution over Jülich

**Dr. Georgina King**

Institute of Earth Surface Dynamics (University of Lausanne)

Geochronology in the Earth Sciences

**Maxwell Thiemens**

Institute of Geology and Mineralogy (University of Cologne)

Cosmochemical insights to lunar formation  
and evolution
